

# CLEANING GUIDELINES

## STRUTTER™ Window Cleaning Guidelines

Regular maintenance and cleaning of your Strutter windows are essential to ensure their longevity and uphold a professional appearance for your business. These cleaning guidelines outline our best practices for cleaning your Strutter window. By following these steps, you can expect to maintain the aesthetic appeal and keep them in optimal condition.

### Materials and Tools Needed:

- Mild detergent or soap
- Water
- Soft sponge or microfiber cloth
- Non-abrasive brush or toothbrush
- Bucket or container
- Ladder or step stool (if necessary)
- Glass cleaner
- Soft towels or lint-free cloths
- Protective gloves (optional)

### CLEANING PROCESS

#### Preparation:

- a. Ensure the Strutter window is closed and securely locked to prevent accidents or unauthorized operation.
- b. Remove any loose dirt or debris from the glass surface using a soft brush or cloth.

#### Surface Cleaning:

- a. Fill a bucket or container with warm water.
- b. Add a small amount of mild detergent or soap to the water and mix until it forms a soapy solution.
- c. Wet a soft sponge or microfiber cloth in the soapy water and gently scrub the entire surface of the Strutter Window.
- d. Pay extra attention to areas with visible stains, smudges, or dirt buildup.
- e. Use a non-abrasive brush or toothbrush to clean hard-to-reach areas, such as corners or grooves.
- f. Rinse the sponge or cloth frequently in clean water to remove dirt and soap residue.

## **Glass Cleaning:**

- a. Use a suitable glass cleaner to clean the glass surfaces.
- b. Spray the glass cleaner onto a soft cloth or paper towel, and wipe the glass in a circular motion until it is clean and streak-free.
- c. Avoid spraying the glass cleaner directly onto the glass to prevent it from seeping into the aluminum frame.

## **Rinsing and Drying:**

- a. After cleaning the entire surface, rinse the Strutter Window thoroughly with clean water to remove any remaining soap or detergent residue.
- b. Wipe the Strutter Window dry with soft towels or lint-free cloths, ensuring that all moisture is removed to prevent water spots or streaks.
- c. If necessary, use a ladder or step stool to reach higher areas safely.

## **Regular Maintenance Tips:**

- a. Clean Strutter windows at least once a month to prevent the buildup of dirt and grime.
- b. Avoid using abrasive cleaners, steel wool, or harsh chemicals, as they can damage the aluminum surface.
- c. Inspect the Strutter Window regularly for any signs of damage, such as scratches, dents, or loose fittings, and address them promptly.

By following these guidelines for cleaning your Strutter windows, you can maintain their aesthetic appeal and ensure their longevity. Regular cleaning, gentle handling, and proper maintenance will help your Strutter windows make a positive impression on customers while contributing to your business's overall cleanliness and professionalism.
